

Proton Beam Therapy Centre

The UK's first high energy proton beam therapy centre

CLIENT

The Christie Hospital

LPA

Manchester City Council

STATUS

Built and open

SERVICES

Planning, EIA

Our role

- We successfully secured planning permission from Manchester City Council for the UK's first high energy Proton Beam Therapy Centre at the Christie Hospital in Withington in September 2014.
- The new Proton Beam Therapy Centre is a high-profile scheme that will bring substantial health and economic benefits to the city region.
- Over the course of the project we provided strategic planning and Environmental Impact Assessment (EIA) advice, including undertaking due diligence and planning risk appraisal, and co-ordinated the submission and determination of the planning application.

Results

- To deliver this commission, we worked closely with The Christie NHS Foundation Trust and their contractor (Interserve Construction Limited).
- In doing so, we developed strong relationships with these organisations and have become their trusted town planning adviser and stakeholder engagement specialist. As a result, we have been retained on subsequent projects, including the delivery of further staff parking and the redevelopment of the fire-damaged Paterson building.
